

Appit™

Workflow and forms apps for SharePoint,
in the cloud.

A smarter way to work with SharePoint

K2 Appit™ for SharePoint is a cloud-based service that enables both technical and non-technical users to build powerful SharePoint workflow and forms apps. Appit takes the hassle and complexity out of the Microsoft SharePoint tasks that business users perform every day. Appit lets your users quickly create secure, mobile-ready workflows, forms and business apps that meet their immediate needs, with little to no code.

Use Appit to help your people work more efficiently in SharePoint, be it customizing a SharePoint form for data input needs, creating workflows and forms to handle approvals across multiple sites, or deploying a SharePoint business app with integration across line-of-business (LOB) systems.

NO CODE, MOBILE-READY FORMS THAT SPAN SHAREPOINT AND LOB SYSTEMS

REUSABLE COMPONENTS, INCLUDING WORKFLOWS, FORMS AND DATA CONNECTIONS

Empower users to solve their own business problems.

Build your own workflows, forms and processes for your SharePoint Online or SharePoint 2013 environment by using simple tools in Appit. Without expert coding skills, users can work with SharePoint the way they want to, instead of feeling boxed in by its workflow or mobile limitations.

- Gain additional return on your SharePoint investment by expanding SharePoint capabilities and enabling users to build workflows and forms that take advantage of SharePoint documents and lists.
- Save money and time by building SharePoint-based apps that grow with your business needs, without coding or complicated tools.
- Keep workers productive with mobile-friendly SharePoint business apps that span your entire SharePoint environment and integrate with your line-of-business systems.

Improve efficiency, speed up processes and meet deadlines faster.

Get customized, mobile-friendly workflows and forms up and running in a fraction of the time you'd expect.

- Appit empowers business users to build SharePoint business apps that fit their needs, without having to wait on IT availability or expertise.
- Reuse application assets, such as data connections, workflow and forms, across multiple systems, making it easier to develop additional solutions quickly.
- Improve efficiency, speed up processes and better meet deadlines by cutting out repetitive tasks.
- Make it easy to get work done as quickly as you want, anywhere you are with simple task management tools and mobile apps.

Make the most informed business decisions with real-time data.

K2 Appit for SharePoint makes it simple to create mobile-ready workflows and forms that reach across disparate lines of business, departments and people to surface the right information at the right time.

- Build SharePoint applications that integrate with line-of-business systems – like Microsoft Dynamics CRM, SQL Server, Web services and more – on premises and in the cloud, to provide robust workflows and forms that span your entire organization.
- Get business done faster with integrated systems that relieve process bottlenecks and remove workflow roadblocks.
- Give the business visibility with customizable reporting dashboards that pull data from processes and workflows across the entire organization.

K2 Appit for SharePoint provides workflow and forms apps, in the cloud.

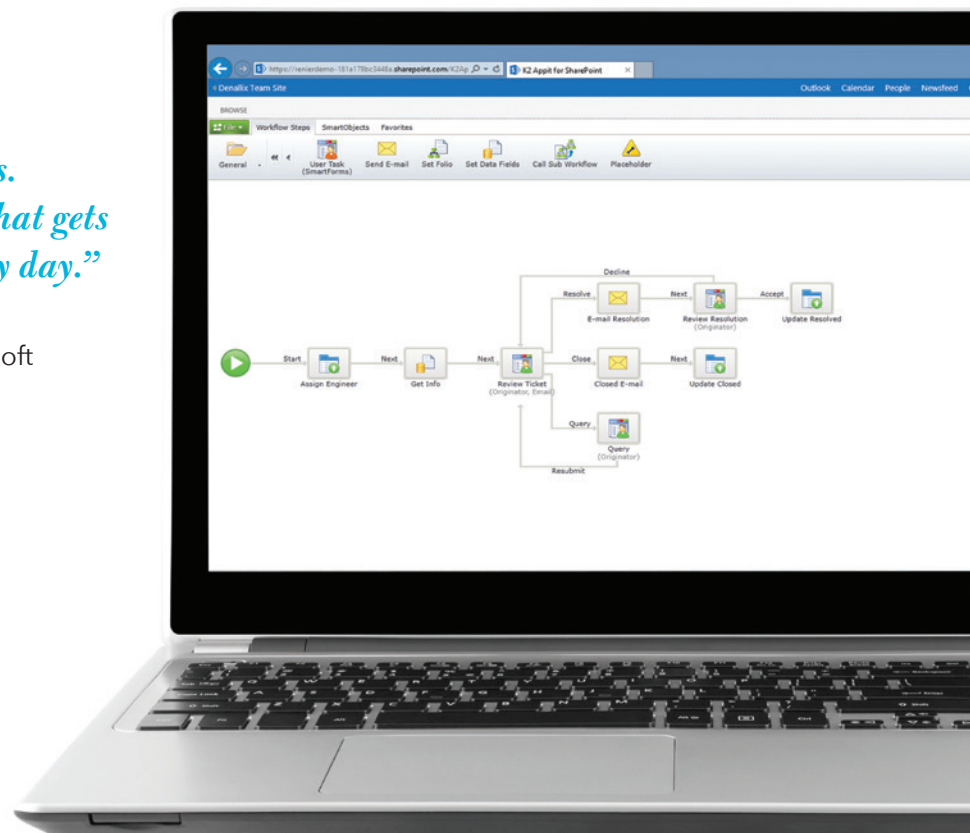

Give SharePoint users access to their work at any time and from anywhere, with real-time information that enables smarter, faster decisions.

- Intuitive, browser-based designers help users to quickly build and customize SharePoint workflows and forms.
- Appit workflows and forms aren't limited to a single SharePoint list or library, but can span SharePoint lists, libraries and sites, on premises or in the cloud.
- Integrate SharePoint-based workflow and forms apps with line-of-business systems that reside on premises or in the cloud, without writing code.
- Make SharePoint apps available wherever your people work - within SharePoint, via email or on a mobile device.

“[It’s] solving real user problems. I just love to see that. That’s always what gets me excited about coming to work every day.”

– Rob Lefferts –

Principal Group Program Manager, Microsoft

Around the world,
there are more than a million
people in 80+ countries using
K2 to save money, reduce risk
and grow revenue.

*“Once we saw what we could do with [K2 Appit
for SharePoint], we saw that in every case it exceeded
what we could already do with SharePoint Designer.”*
